Summary

Motivated and Driven AI and data science engineering student with expertise in Python, machine learning, and deep learning. Developed an MRI-based AI solution for autism spectrum disorder classification using CNN and TensorFlow, demonstrating proficiency in end-to-end system design. Experienced in backend development with FastAPI, focusing on database integration and web application deployment

Experience

• NEUROSCAN AI - FINAL YEAR PROJECT EPCET | 2025 - 2026

- Developed NeuroScan AI, an AI-powered web application for early Autism Spectrum Disorder (ASD) detection using MRI brain scans.
- Trained and optimized a CNN-based deep learning model in TensorFlow for multi-class severity classification (No ASD, Mild, Moderate, Severe).
- Applied image preprocessing techniques such as resizing and normalization to improve model performance and generalization.
- Built a full-stack application using FastAPI backend with an interactive frontend interface.
- Integrated real-time MRI upload and instant AI-based prediction system for efficient diagnosis support.
- Implemented SQLite database, secure authentication, and an AI chatbot for user assistance and record management.

• 5TH SEM MINI-PROJECT EPCET | 2025 - 2026

- Developed a Python-based system recommending recipes based on user-input ingredients.
- Designed and implemented a structured recipe database, standardizing ingredient data for accurate matching.
- Applied machine learning technologies, including pandas and scikit-learn, for data preprocessing and recipe similarity matching.
- Developed interactive UI with Streamlit for real-time recipe recommendations, improving user engagement.
- Reached 81% accuracy in recommendations, increasing user satisfaction through tailored suggestions.

Education

• EAST POINT COLLEGE OF ENGINEERING AND TECHNOLOGY

8th semester - 7.4(CGPA)
2022-2026

• CMR NATIONAL PU COLLEGE

Pre-University - 75.00%
2020 - 2022

• FLORENCE PUBLIC HIGH SCHOOL

10th - 83.00%
2020

Skills

- Python and SQL
- Data analysis and machine learning
- Streamlit and VS Code
- Power BI and web development
- Data engineering
- Leadership and teamwork
- Time management
- Communication skills
